# ASP.NET Identity – OpenID Connect

What is OpenID Connect?

- A new protocol, released 2014
- OAuth 2.0 + Identity layer
- Authentication
- Authorization
- Replaces OpenID

OpenID Connect

| Identity Layer | OAuth 2.0 |

- Login providers were using OAuth for authentication rather than using OpenID

- Made their own extensions
    ex. Facebook uses and extension called Signed Request

- OpenID is closed

ASP.NET Identity – OpenID Connect

```
app.UseOpenIdConnectAuthentication(
    new OpenIdConnectAuthenticationOptions
    {
        ClientId = "d04fb01f-0715-4ed7-a656-0793b545e1f1",
        Authority = "https://login.windows.net/6c3d51dd-f0e5-4959-b4ea-a80c4e36fe5e"
    });
```
